## SPEC for Mass Production

| Spec No. | TQ3C-8EAF0-E1YAN48-01 |
|----------|-----------------------|
| Date     | June 25, 2024         |

## TYPE: TCG057QVLCAANN-HN50

< 5.7 inch QVGA transmissive color TFT with LED backlight>

#### **CONTENTS**

- 1. Application
- 2. Construction and outline
- 3. Mechanical specifications
- 4. Absolute maximum ratings
- 5. Electrical characteristics
- 6. Optical characteristics
- 7. Interface signals
- 8. Input timing characteristics
- 9. Backlight characteristics
- 10. Lot number identification
- 11. Warranty
- 12. Precautions for use
- 13. Reliability test data
- 14. Outline drawing

### KYOCERA CORPORATION

This specification is subject to change without notice.

Consult Kyocera before ordering.

# Warning

- 1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
- 2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

### Caution

- 1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.
- 2. Please note that we may not be able to respond to new environmental regulations after receiving the final mas production order for this product.

# 1. Application

This document defines the specification of TCG057QVLCAANN-HN50. (RoHS Compliant)

## 2. Construction and outline

LCD : Transmissive color dot matrix type TFT

Backlight system : LED

Polarizer : Glare Low-reflection treatment

Additional circuit : Timing controller, Power supply (3.3V input)

(without constant current circuit for LED Backlight)

## 3. Mechanical specifications

| Item                  | Item Specification                              |     |
|-----------------------|---|-----|
| Outline dimensions 1) | 144(W)×(104.8)(H)×13(D)                         | mm  |
| Active area           | 115.2(W)×86.4(H)<br>(14.4cm/5.7 inch(Diagonal)) | mm  |
| Dot format            | 320×(B,G,R)(W)×240(H)                           | dot |
| Dot pitch             | 0.12(W)×0.36(H)                                 | mm  |
| Base color 2)         | Normally White                                  | -   |
| Mass                  | 210   | g   |

- 1) Projection not included. Please refer to outline for details.
- 2) Due to the characteristics of the LCD material, the color varies with environmental temperature.

| Spec No.              | Part No.            | Page |

#### 4. Absolute maximum ratings

### 4-1. Electrical absolute maximum ratings

| Item                 |        | Symbol            | Min. | Max. | Unit |
|----------------------|--------|-------------------|------|------|------|
| Supply voltage       |        | $V_{\mathrm{DD}}$ | 0    | 4.0  | V    |
| Input signal voltage | 1)     | $V_{\rm IN}$      | -0.3 | 6.0  | V    |
| LED forward current  | 2), 3) | IF                | -    | 100  | mA   |

- 1) Input signal: CK, R0~R5, G0~G5, B0~B5, H<sub>SYNC</sub>, V<sub>SYNC</sub>, ENAB, R/L, U/D
- 2) For each "AN-CA"
- 3) Do not apply reversed voltage.

#### 4-2. Environmental absolute maximum ratings

| Item                  |    | Symbol            | Min. | Max. | Unit                 |
|-----------------------|----|-------------------|------|------|----------------------|
| Operating temperature | 1) | $T_{OP}$          | -20  | 70   | $^{\circ}\mathrm{C}$ |
| Storage temperature   | 2) | $T_{STO}$         | -30  | 80   | °C                   |
| Operating humidity    | 3) | $H_{\mathrm{OP}}$ | 10   | 4)   | %RH                  |
| Storage humidity      | 3) | $H_{STO}$         | 10   | 4)   | %RH                  |
| Vibration             |    | -                 | 5)   | 5)   | -                    |
| Shock                 |    | -                 | 6)   | 6)   | -                    |

- 1) Operating temperature means a temperature which operation shall be guaranteed. Since display performance is evaluated at 25°C, another temperature range should be confirmed.
- 2) Temp. = -30°C < 48h , Temp. = 80°C < 168hStore LCD at normal temperature/humidity. Keep them free from vibration and shock. An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard.
  - (Please refer to "Precautions for Use" for details.)
- 3) Non-condensing
- 4) Temp. ≤ 40°C, 85%RH Max.

Temp.>40°C, Absolute humidity shall be less than 85%RH at 40°C.

5)

| Frequency       | 10∼55 Hz | Acceleration value          |
|-----------------|----------|-----------------------------|
| Vibration width | 0.15mm   | $(0.3\sim 9 \text{ m/s}^2)$ |
| Interval        | 10-55-10 | 0 Hz 1 minute               |

2 hours in each direction X, Y, Z (6 hours total) EIAJ ED-2531

6) Acceleration: 490 m/s2, Pulse width: 11 ms

3 times in each direction:  $\pm X$ ,  $\pm Y$ ,  $\pm Z$ 

**EIAJ ED-2531** 

| Spec No.              | Part No.            | Page |

- 1) If the display is used under the condition which is out of specifications such as higher clock frequency than specified value, there is a possibility phenomenon such as display error including white display, malfunction and no image may occur. Please use the display under the conditions written in the specification.
- 2) In case of lower frequency, the deterioration of the display quality, flicker etc., may occur.

# 8-2. Horizontal display position

| Item   |             | Symbol | Min | Тур | Max    | Unit  | Note |
|--|-------------|--------|-----|-----|--------|-------|------|
| Enable sime  | Set up time | Tes    | 5   | _   | Tc-10  | ns    |      |
| Enable signal                                      | Pulse width | Тер    | 2   | 320 | TH-10  | clock |      |
| H <sub>SYNC</sub> – Enable signal phase difference |             | The    | 2   |     | TH-340 | clock |      |

- 1) When ENAB is fixed at "Low", the display starts from the data of C52(clock) as shown in 8-5.
- 2) The horizontal display position is determined by ENAB signal.

#### 8-3. Vertical display position

- 1) The vertical display position (TVs) is 7th line.
- 2) ENAB signal is independent of vertical display position.

| Spec No.              | Part No.            | Page |
|-----------------------|---------------------|------|
| TQ3C-8EAF0-E1YAN48-01 | TCG057QVLCAANN-HN50 | 9    |

## 8-4. Input data signals and display position on the screen

## 8-5. Input timing characteristics

- 1) When ENAB is fixed at "Low", the display starts from the data of C52 (Clock).
- 2) The vertical display position (TVs) is fixed at 7th line.

| Spec No.              | Part No.            | Page |
|-----------------------|---------------------|------|
| TQ3C-8EAF0-E1YAN48-01 | TCG057QVLCAANN-HN50 | 10   |

## 9. Backlight characteristics

Temp.  $=25^{\circ}C$ 

| Item                |        | Symbol | Min. | Тур.   | Max. | Unit | Note              |
|---------------------|--------|--------|------|--------|------|------|-------------------|
| Forward current     | 1)     | IF     | -    | 60     | -    | mA   | Ta=-20~70°C       |
|                     | 1)     |        | 1    | 18.9   | 22.1 | V    | IF=60mA, Ta=-20°C |
| Forward voltage     |        | VF     | 1    | 18.0   | 21.2 | V    | IF=60mA, Ta=25℃   |
|                     |        |        | -    | 17.5   | 20.6 | V    | IF=60mA, Ta=70°C  |
| Operating life time | 2), 3) | Т      | -    | 50,000 | -    | h    | IF=60mA, Ta=25℃   |

- 1) For each "AN-CA"
- 2) When brightness decrease 50% of minimum brightness.
- 3) Life time is estimated data.(Condition : IF=60mA, Ta=25 $^{\circ}$ C in chamber).
- 4) An input current below 15mA may reduce the brightness uniformity of the LED backlight. This is because the amount of light from each LED chip is different. Therefore, please evaluate carefully before finalizing the input current.

| Spec No.              | Part No.            | Page |

| TQ3C-8EAF0-E1YAN48-01 | TCG057QVLCAANN-HN50 | 11   |

### 10. Lot number identification

The lot number shall be indicated on the back of the backlight case of each LCD.

No① - No⑥ above indicate

- ① Data matrix (For internal control purpose only)
- ② Year code (The last digit of the year)
- 3 Month code
- 4 Day code
- ⑤ Version number (Max. 7 characters)
- 6 Country of origin

### 3 Month code

| Month | Jan. | Feb. | Mar. | Apr. | May | Jun. |  |
|-------|------|------|------|------|-----|------|--|
| Code  | 1    | 2    | 3    | 4    | 5   | 6    |  |

| Month | Jul. | Aug. | Sep. | Oct. | Nov. | Dec. |
|-------|------|------|------|------|------|------|
| Code  | 7    | 8    | 9    | X    | Y    | Z    |

## 11. Warranty

#### 11-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

#### 11-2. Production warranty

Kyocera warrants the LCDs for a period of 12 months from the ship date. Kyocera shall, by mutual agreement, replace or re-work defective LCDs that are shown to be Kyocera's responsibility.

| Spec No.              | Part No.            | Page |
|-----------------------|---------------------|------|
| TQ3C-8EAF0-E1YAN48-01 | TCG057QVLCAANN-HN50 | 12   |

### 12. Precautions for use

#### 12-1. Installation of the LCD

1) The LCD has a grounding hole. Please ground the LCD to prevent noise and to stabilize its performance as circumstances demand.

- 2) A transparent protection plate shall be added to protect the LCD and its polarizer
- 3) The LCD shall be installed so that there is no pressure on the LSI chips.
- 4) The LCD shall be installed flat, without twisting or bending.
- 5) Please refer to the following our recommendable value of Clamp-down torque when installing. Clamp-down torque: 0.32±0.03N·m

Please set up 'SPEED-LOW', 'SOFT START-SLOW' when using electric driver.

Recommendable screw JIS tapping screw two types nominal dia.3.0mm installing boss hole depth 3.5±0.5mm

Please be careful not to use high torque which may damage LCD in installation.

6) A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.

#### 12-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required.
- 2) Workers should use body grounding. Operator should wear ground straps.

### 12-3. LCD operation

1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.

#### 12-4. Storage

- 1) The LCD shall be stored within the temperature and humidity limits specified. Store in a dark area, and protect the LCD from direct sunlight or fluorescent light.
- 2) Always store the LCD so that it is free from external pressure onto it.

| Spec No.              | Part No.            | Page |
|-----------------------|---------------------|------|
| TQ3C-8EAF0-E1YAN48-01 | TCG057QVLCAANN-HN50 | 13   |

#### 12-5. Usage

- 1) <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.
- 2) The front polarizer is easily scratched or damaged. Prevent touching it with any hard material, and from being pushed or rubbed.
- 3) The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad using a little Ethanol.
- 4) Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from any source immediately.
- 5) Always keep the LCD free from condensation during testing. Condensation may permanently spot or stain the polarizer.
- 6) Do not pull the LED lead wires and do not bend the root of the wires. Housing should be designed to protect LED lead wires from external stress.
- 7) Do not disassemble LCD because it will result in damage.
- 8) This Kyocera LCD has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.
- 9) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 10) Liquid crystal may leak when the LCD is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

#### 13. Reliability test data

| Test item                      | Test condition                       | Test condition Test time Judgem |  | gement  |

| High temp.<br>operation        | 70°C                                 | 500h                            | Display function Display quality Current consumption | <ul><li>: No defect</li><li>: No defect</li><li>: No defect</li></ul> |

- 1) Each test item uses a test LCD only once. The tested LCD is not used in any other tests.
- 2) The LCD is tested in circumstances in which there is no condensation.
- 3) The reliability test is not an out-going inspection.
- 4) The result of the reliability test is for your reference purpose only.

  The reliability test is conducted only to examine the LCD's capability.
