# Warning

- 1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
- 2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

#### Caution

- 1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.
- 2. Please note that we may not be able to respond to new environmental regulations after receiving the final mass production order for this product.

### 1. Application

This document defines the specification of TCG121XGLPCPNN-AN70-TA. (RoHS Compliant)

### 2. Construction and outline

LCD : Transmissive color dot matrix type TFT

Backlight system : LED

Polarizer : Anti-Glare treatment

Interface : LVDS

Additional circuit : Timing controller, Power supply (3.3V input)

(without constant current circuit for LED Backlight)

### 3. Mechanical specifications

Item	Specification	Unit
Outline dimensions 1)	260.5(W)×203(H)×10.4(D)	mm
Active area	245.76(W)×184.32(H) (30.8cm/12.1 inch(Diagonal))	mm
Dot format	1,024×(B,G,R)(W)×768(H)	dot
Dot pitch	0.08(W)×0.24(H)	mm
Base color 2)	Normally Black	-
Mass	555	g

- 1) Projection not included. Please refer to outline for details.
- 2) Due to the characteristics of the LCD material, the color varies with environmental temperature.

### 4. Absolute maximum ratings

### 4-1. Electrical absolute maximum ratings

- 1) Operating temperature means a temperature which operation shall be guaranteed. Since display performance is evaluated at 25°C, another temperature range should be confirmed.
- 2) Panel surface temperature (all the surface).
- 3) Ta (Ambient Temperature)= -30°C < 48h, Ta= 80°C < 168h

  Store LCD at normal temperature/humidity. Keep them free from vibration and shock.

  An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard.

  (Please refer to "Precautions for Use" for details.)
- 4) Non-condensing

- 1) If the display is used under the condition which is out of specifications such as higher clock frequency than specified value, there is a possibility phenomenon such as display error including white display, malfunction and no image may occur. Please use the display under the conditions written in the specification.
- 2) Please set a clock frequency, a vertical dormant period, and the horizontal dormant period so that the Horizontal Period should not reach less than Min. value.
- 3) If the refresh rate reach less than Min. value, the deterioration of the display quality, flicker etc., may occur.(fv=1/Tv)

- 1) For each "AN-CA"
- 2) When brightness decrease 50% of minimum brightness.

  The average life of a LED will decrease when the LCD is operating at higher temperatures.
- 3) Life time is estimated data. (Condition: IF=75mA, Temp. =25°C in chamber).
- 4) An input current below 15mA may reduce the brightness uniformity of the LED backlight. This is because the amount of light from each LED chip is different. Therefore, please evaluate carefully before finalizing the input current.
- 5) LED formation: 10 series, 4 parallel

#### 10. Lot number identification

The lot number shall be indicated on the back of the backlight case of each LCD.

No. 1 - No. 7 above indicate

- ① Data matrix (For internal control purpose only)
- ② Version number (Max. 4 characters)
- 3 Year code (The last digit of the year)
- 4 Month code
- ⑤ Day code
- 6 Version number (Max. 7 characters)
- 7 Country of origin

#### 4 Month code

Code	1	2	3	4	5	6	

Month	Jul.	Aug.	Sep.	Oct.	Nov.	Dec.
Code	7	8	9	X	Y	$\mathbf{Z}$

### 11. Warranty

### 11-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

#### 11-2. Production warranty

Kyocera warrants the LCDs for a period of 12 months from the ship date. Kyocera shall, by mutual agreement, replace or re-work defective LCDs that are shown to be Kyocera's responsibility.

TQ3C-8EAF0-E1YAL89-01	TCG121XGLPCPNN-AN70-TA	16

#### 12. Precautions for use

#### 12-1. Installation of the LCD

- 1) A transparent protection plate shall be added to protect the LCD and its polarizer.
- 2) The LCD shall be installed so that there is no pressure on the LSI chips.
- 3) Since this product is wide viewing product, occurrence level of in-plane unevenness by the external stress is different compared to current normal viewing product. So there is a possibility that in-plane unevenness will be occurred by over twist, strain giving by attaching to LCD, and over pressure to touch panel. Please be careful of stress when designing the housing.
- 4) A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.

#### 12-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required.
- 2) Workers should use body grounding. Operator should wear ground straps.

#### 12-3. LCD operation

- 1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.
- 2) Please select the best display pattern based on your evaluation because flicker, lines or nonuniformity or unevenness can be visible depending on display patterns.

### 12-4. Storage

- 1) The LCD shall be stored within the temperature and humidity limits specified. Store in a dark area, and protect the LCD from direct sunlight or fluorescent light.
- 2) Always store the LCD so that it is free from external pressure onto it.

### 12-5. Usage

- 1) <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.
- 2) The front polarizer is easily scratched or damaged. Prevent touching it with any hard material, and from being pushed or rubbed.
- 3) The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad using a little Ethanol.
- 4) Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from any source immediately.
- 5) Always keep the LCD free from condensation during testing. Condensation may permanently spot or stain the polarizer.
- 6) Do not disassemble LCD because it will result in damage.
- 7) This Kyocera LCD has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.
- 8) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 9) Liquid crystal may leak when the LCD is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

High temp. operation	80°C	500h	Display function Display quality Current consumption	: No defect : No defect : No defect

- 1) Each test item uses a test LCD only once. The tested LCD is not used in any other tests.
- 2) The LCD is tested in circumstances in which there is no condensation.
- 3) The reliability test is not an out-going inspection.
- 4) The result of the reliability test is for your reference purpose only.

  The reliability test is conducted only to examine the LCD's capability.
